English – Native speaker

Hebrew – Native speaker

Profile

Motivated Frontend Developer with a strong proficiency in React seeking to leverage my technical skills, experience in UI/UX design, and API development at a dynamic company.

Work experience

Front-end Developer   Freelance | 2023

- Developed a comprehensive React web application using Firebase's powerful tools to offer a dynamic job board experience for employers and employees.
- Utilized Cloud Firestore's flexible NoSQL document structure to store and manage data efficiently. Implemented CRUD operations for seamless data manipulation.
- Integrated Cloud Storage to handle user resume files.
- Used Firebase Authentication to provide secure user registration and login functionalities, including google authentication.
- Used firebase email extension to communicate between employees and employers.
- Developed logic functions to convert job times to the user's chosen time zone, offering a personalized experience and aiding in efficient scheduling.
- Utilized react hooks to develop a seamless flow of data and navigation across the application.
- Implemented cookies to improve user experience.

Front-end Developer   Elementor Internship | 2023

- Collaborated with cross-functional teams to design, develop, and maintain user-friendly web applications using React and Node.js.
- Implemented Docker for efficient development environments and successfully set up configuration for smooth deployment processes.
- Implemented pre-commit hook rules using ESLint and Husky precommit, ensuring code quality and consistent formatting across the team.
- Designed and developed custom APIs to enhance functionality and improve data exchange between frontend and backend systems.
- Leveraged React, Node.js, and MongoDB to create scalable and responsive user interfaces and integrate them with robust backend systems.
- Spearheaded the development of a UX/UI feature that allowed users to seamlessly delete their websites, improving the overall user experience.
- Utilized the Redux library to manage global state and ensure efficient data flow and consistency throughout the application.

Graphics and Animation Creator   Self-employed | 2020-2021

- Conceptualized and designed captivating animations and motion graphics using Adobe After Effects, creating engaging visuals for clients' websites and marketing campaigns.
- Produced and edited video content with Adobe Premiere, optimizing video quality and pacing for maximum impact.
- Designed custom vector graphics and illustrations using Adobe Illustrator, enhancing user interfaces and branding.
- Collaborated closely with clients to understand their vision, translating concepts into visually appealing animations and designs.
- Successfully managed multiple projects simultaneously, meeting tight deadlines and delivering high-quality work that exceeded client expectations.
